## No Whiskey!

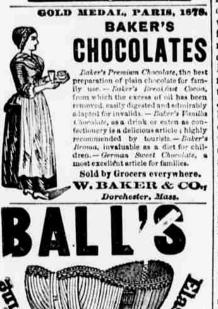

Brown's Iron BITTERS is one of the very few tonic medicines that are not composed mostly of alcohol or whiskey, thus becoming a fruitful source of intemperance by promoting a desire for rum.

Brown's Iron Bitters is guaranteed to be a nonintoxicating stimulant, and it will, in nearly every case, take the place of all liquor, and at the same time absolutely kill the desire for whiskey and other intoxicating beverages.

Rev. G. W. RICE, editor of the American Christian Review, says of Brown's Iron Bitters:

Cin., O., Nov. 16, 1881. Gents:—The foolish wast-ing of vital force in business, pleasure, and vicious indulgence of our people, makes your preparation a necessity; and if applied, will save hundreds who resort to saloons for temporary recuperation.

Brown's Iron BITTERS has been thoroughly tested for dyspepsia, indigestion, biliousness, weakness, debility, overwork, rheumatism, neuralgia, consumption, liver complaints, kidney troubles, &c., and it never fails to render speedy and permanent relief.

In the folding room he found a gold watch in a bouquet of flowers on a young lady's table, and paralyzed a colored messen-ger by drawing a roll of greenbacks out of his beard. He apparently changed a sheet of drawing paper into a thousand dollar bond, Into

and then as quickly changed it back. Several old ladies crossed themselves devoutly as Herrmann passed by them, and some colored men were seen to shake their heads, as they muttered something about "the debbil." After thoroughly examining the building, and giving the employes a semi-holiday, the party returned to Williard's, where, upon geting out of the carriage, the driver was nonplussed by seeing his dark-haired passenger deliberately pull the dust robe out of a hole in the lamp post, and then coolly discover several hun-

dred dollars in it.

The Dry Tortugas W. R. Prentice, an old New York soldier, recalls the following interesting reminiscences of the old military prison, in a letter to the San Francisco Bulletin:

There every fine day, when chine of the kind in existence, the balls are placed under a pressure of business was over, when the bank was closed, when the exchange was defrom 3,000 to 4,000 pounds to the square inch. The water touching the ball at every point, and the pressure being serted, crowds of pleasure seekers gathered to enjoy the air and display their rich clothes. If the dress that has displaced the garb of that period equally transmitted the result is a perfectly pressed sphere of just the same specific gravity in one spot as in another. Without this apparatus the at least more convenient. A gentle-man of the last century, if he were a successful manufacture of billiard balls from bonislate would have been impossible. A simple but ingenious contrivance is also employed to ascertain laced. His hair was done up in a cue when the balls are perfectly poised or balanced. They are first weighed and are then placed in a fist dish of merprofusion of powder. His coat was light-colored, with diminutive cape, cury. This subtle fluid detects the slightest shade of inaccuracy, and the marvelously long back and silver but-tons engraved with the letters of his balls are put in the lathe and correctname. His small clothes came scarce ed until they are absolutely true. Not only billiard, but pool and bagatelle to his knees; his stockings were striped; his shoes pointed and adorned balls are made. The prices at which they are sold are far below those charged for ivory, ranging from \$5.50 to \$13.50 per set of four balls for billead, If he were so happy as to have seen some service during the war he liards, and from \$26 to \$50 per set of affected a military bearing and had sixteen balls for pool.
